

# Overview of Meaningful Use Criteria: Stage 1

## Core Set – Must Achieve All 15

OBJECTIVE	MEASURE
Use CPOE (Computer Provider Order Entry) for medication orders	More than 30% of patients with medications listed have at least one medication ordered through CPOE
Implement drug-drug and drug-allergy interaction checks	Enable functionality for the entire EHR reporting period
Generate and transmit permissible prescriptions electronically	More than 40% transmitted electronically through EHR
Record Demographics: Preferred Language, Gender, Race, Ethnicity, Date of Birth	More than 50% of patients have demographics recorded as structured data
Maintain an up-to-date problem list of current and active diagnoses	More than 80% of patients have at least one entry recorded as structured data
Maintain active medication list	More than 80% of patients have at least one entry recorded as structured data
Maintain active medication allergy list	More than 80% of patients have at least one entry recorded as structured data
Record and chart changes in vital signs: Height, Weight, Blood Pressure, BMI, Growth Charts for Children	More than 80% of patients age 2 years and older have height, weight and blood pressure recorded as structured data
Record smoking status for patients age 13 years and older	More than 50% of patients age 13 years and older have smoking status recorded as structured data
Implement one clinical decision support rule and ability to track compliance with the rule	Implement one clinical decision support rule
Report clinical quality measures to CMS or the States	2011: Provide aggregate numerator and denominator through attestation; 2012: Electronically submit clinical quality measures
Upon request, provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, medication allergies)	More than 50% of requesting patients receive electronic copy within 3 business days
Provide clinical summaries for patients for each office visit	Clinical summaries provided to patients for more than 50% of all office visits within 3 business days
Implement capability to electronically exchange key clinical information among providers and patient-authorized entities	Perform at least one test of EHR's capacity to electronically exchange key clinical information
Protect privacy and security of patient data in the EHR	Conduct or review a security risk analysis, implement security updates and correct identified security deficiencies

## Menu Set – Must Achieve 5 out of 10

OBJECTIVE	MEASURE
Implement drug-formulary checks	Drug formulary check is enabled and has access to at least one internal or external drug formulary for the entire reporting period
Incorporate clinical lab test results into EHRs as structured data	More than 40% of clinical lab tests whose results are in positive/negative or numerical format are incorporated into EHRs as structured data
Generate lists of patients by specific conditions to use for quality improvement, reduction of disparities, research or outreach	Generate at least one report listing patients of the EP
Send reminders to patients per patient preference for preventive/follow up care	More than 20% of patients age 65 years and older or age 5 years and younger are sent appropriate reminders
Provide patients with timely electronic access to their health information (including lab results, problem list, medication lists, medication allergies)	More than 10% of patients are provided electronic access to information within 4 days of its being updated in the EHR
Use EHR to identify patient-specific education resources and provide those resources to the patient if appropriate	More than 10% of patients are provided patient-specific education resources
Perform medication reconciliation for transfer patients	More than 50% of transfer patients have medications reconciled
Provide summary of care record for transfer/referral patients	More than 50% of transfer/referral patients have summary of care record
Submit electronic immunization data to immunization registries or immunization information systems	Submit at least one test of data and, if successful, follow-up submission (where registries can accept electronic data)
Submit electronic syndromic surveillance data to public health agencies	Submit at least one test of data and, if successful, follow-up submission (where public health agencies can accept electronic data)
